*The work reported here received financial support from many sources. Those that apply to particular areas or countries are acknowledged in the corresponding sections below. Here we acknowledge grants for central services and coordinations to A. Keys from National Heart Institute (No. HE04697), from the American Heart Association (New York), from the International Cardiology Foundation, from David Winton and the Winton Companies Fund (Minneapolis), from the California State Olive Advisory Board (San Francisco), and from anonymous donors. Special expenses of publication were defrayed by the Ober Charitable Foundation. The work at the coordinating center at the University of Minnesota was also aided by a grant from the National Heart Institutes (no. HE 06314) to Robert B. Howard for the Cardiovascular Clinical Research Program; University of Minnesota, Minneapolis; Centro per la Malattie Cardiovascolari, Rome; University of Zagreb, Zagreb; University of Helsinki, Helsinki; Institute of Occupational Health, Helsinki; University of Athens, Athens; University of Perugia, Perugia; Ministry of Transport, Rome; University of Kurume, Kurume; Haarlem, the Netherlands; University of Belgrade, Belgrade; Section on Cardiovascular Diseases, World Health Organization, Geneva; Netherlands Institute of Nutrition, Wageningen, the Netherlands; Characopeios School of Home Economics, Athens.*

*In the work at the Central Headquarters at the University of Minnesota in Minneapolis, important assistance was given in data processing by Messrs. Norris Schulz, Howard Palefsky, John Vilandre and Miss Rosemarie Wirtz. We are grateful also to Mrs. Margaret Heminghaus and Miss Linda Cordes for secretarial and clerical help.*
